About

🚀 Cybersecurity | Offensive Security | DevSecOps | Security Engineering | Automation

I'm a cybersecurity professional specializing in penetration testing, application security, and threat analysis, with hands-on experience securing web, API, network, and mobile environments.

At Forenzy Networks, I work on identifying and exploiting real-world vulnerabilities across enterprise systems, delivering actionable remediation strategies to strengthen security posture. My work spans end-to-end security assessments, WAF deployment and tuning, and integrating security practices within DevSecOps workflows to improve resilience at scale.

Beyond testing, I focus on building and optimizing security processes; developing automation tools and scripts to enhance DAST/SAST efficiency, reduce manual effort, and improve vulnerability detection coverage.

🔹 Core Areas of Expertise:

Penetration Testing (Web, API, Network, Mobile)
Vulnerability Assessment & Risk Analysis
Threat Modeling & Threat Hunting
DevSecOps & Security Automation
WAF Management & Security Monitoring

🌍 Community & Impact:
As a volunteer with Cyber N GO Charitable Trust, I contribute to cybersecurity awareness, research, and initiatives in collaboration with law enforcement and educational institutions; helping individuals and organizations better understand and defend against evolving cyber threats.

💡 Mindset:
I approach security with an attacker's perspective; constantly exploring how systems can be broken, misused, and ultimately strengthened. I'm driven by solving complex security challenges and building practical, scalable defenses for real-world environments.

🚀 Looking Ahead:
I'm interested in opportunities where I can contribute to large-scale security engineering, offensive security, and threat-driven defense, particularly in environments that value innovation, ownership, and impact.

Received (1) | Given (2)

Prachee Parikh · 3rd+
Cyber Security Associate Consultant@ KPMG | CEH | CRTA
October 29, 2024, Mayank was senior to Prachee but didn't manage Prachee directly

I had the pleasure of working with Mayank for five months, focusing on web applications and learning about Web Application Firewalls (WAFs). Working together to understand regex and solve problems was both important and enjoyable. His teamwork and clear communication made our time together productive and fun. Mayank's skills and dedication to cybersecurity make him a valuable asset to any team.
